Thanks to all the runners for coming and supporting the event. We had a record entry of 41 teams. It was also the first time that we had used SI, it needs a little tweaking for next year, but it went quite well.

We had 4 rogue controls, 233-recording 221, 234- recording 229, 238---106, 248---158, so you will understand your splits, these were loaned out to the JK and we didn't know they had reprogrammed them.

Now to the apology , sorry to all M18, 20, 21 and 35 on the A1 course, one slip of my finger on the computer inserted a different number on your course, code 223 should have been code 225, that slip meant that a 3.2 km course became a 5.2km. If both team members had this, it was a double whammy.

Sand is **definitely** a strength sapper!!

Thanks to Kay, Bridget and Jane for help before and on the day.

Control collectors Roger, Bridget, Sarah, Mike and members of BKO and for all the other offers.
